English

You pause for a second, not really sure how to proceed. "Uh..."

"Sure, bro," you say as you smile weakly.

"Sounds good to me, mang," you say while playing it off cool.

"As long as the terms are reasonable, sir," you say with a thoughtful nod.

Reminds me of old school 8bit genre keep up the good work. Where do I start ....well The Dope Game is basicly an old school trading game that is very bare bones (not a bad thing) it kinda reminds me of a simple form of Privateer; You move around the city slinging illicit drugs trying to make a profit while avoiding cops,unfriendly gangs, and anyone else you manage to screw over or off. Along the way you can buy all sorts of weaponry and build up a crew to protect you and your stash. this is a minimilist game meaning the graphics look hand drawn and are all still shots, the dialog is all in written form (so if your a simpleton that doesnt like to read this isnt for you) it is as retro as you can get . it certianly brings me back to my days on my 286 or even my comodore64c (yeah im that old ) but thats the charm of the game. its a single player game but there is an ingame chart that compares you to the rest of the rif raf that also play. the music is cool and well done and you get all of it with the purchase of the DLC which is worth the \$ .99 . So overall its an addictive ( seriously no pun intended) easy to play , time killer ,full of dark humor , that is well worth the low price kinda game. I recomend it and would easily buy new DLC if they ever expand on it.

....PS... this is NOT for anyone under 18 and is also extremly NSFW (there is an option to make the drug names change to something else). Soundtrack worth it. Play that full volume through my speaker on the back of the bus, you know how it is.
